Tutoring Experience

My journey as a tutor began over eight years ago when I discovered my passion for helping students navigate the often challenging world of Economics and Business Management. Initially, I worked as a finance analyst, which provided me with valuable insights into the practical applications of economic theories. However, I soon realized that my true calling was in education, where I could make a more direct impact on students' academic journeys. Over the years, I've developed a teaching style that is both engaging and tailored to the individual needs of each student. I focus on breaking down complex economic models and business strategies into manageable, relatable concepts, ensuring that students not only understand the material but can also apply it confidently in their exams. My experience spans across multiple curriculums, including IB, AP, A-Level, and IGCSE, where I have consistently helped students achieve top grades. I am particularly skilled in assisting with Internal Assessments and Extended Essays, guiding students to produce work that is both academically rigorous and reflective of their personal insights. Watching my students grow in confidence and capability is the most rewarding aspect of my career, and I am committed to continuing to support their success.
